CHIEF/INTEAC/UJRANDOM
CATIDE Double Agent Case

REFERENCES: A. ODCA 12606, 6 November 1964
B. EGMA 65579, 20 November 1964

1. After receipt of Reference A we carefully screened our UJRANDOM and JOVENURE files for possible candidates who would fit 2's description of the case. We used the following criteria as a basis for our research:

- a. CATIDE officers who had been alleged by us to be hostile but not necessarily CIS agents and on whom CATIDE had "dismissed the charges".
- b. CATIDE officers who had been concerned with CIS affairs in the CS/CI section or were presently concerned with Czech or satellite questions.
- c. We eliminated all UJRANDOM suspects of recent vintage since the case has been "going on for many years".
- d. We did not include the qualification of a LCFLUTTER test as essential but routinely checked the files of all CATIDE officers who are known to have been tested.

2. Based on these points we have come up with two eligible candidates. Since both were at one time considered for the UJDROSHKY program (CATIDE version of LCFLUTTER) as Czech speakers, they are most likely some of CATIDE's best Czech speakers. Both were suspected of being "less than candid" after their LCFLUTTER; both cases were discussed with CATIDE in the mid-fifties; both were concerned with Czech affairs; and neither case was ever resolved to our knowledge.

ECGMA - 65607

The investigation of Subject between 1946 and 1953. Subject is German, speaks Czech and Slovak. He was a member of the section of the political aims of the right wing Czech extremists. He was investigated by three senior CATIDE officers on 17 August 1957. The investigation to our knowledge continued until 1957 or 1958 but nothing drastic happened. When [] on 6 May 1964 about the case he was told that he was "disappointing" (civil service rating) because he had falsified his education record. [] on the staff as of that time.

Candidate is

Dr. Emerich OPOZAREK []
V77500
DOB: 15 July 1914
POB: Vienna
SCHREITER
Dr. Emerich SCHAEFFER
Dr. Saker ECKERT

Subject was born [] April 1946, but was with the old Abwehr since 1940. He is a lawyer by trade, speaks fluent Czech, Slovak, English and Russian. He was a member of the Nazi Party (#6, 130, 243) as of May 1943, of the GPR (May 1958) but also apparently a bonafide member of the GPR of July 1960. Subject was working for the Abwehr in Bratislava and worked in the Intelligence Section of the Vlassov Army at the time of the war. He was also a schoolmate of the notorious Dr. Wilhelm HOETTL. Subject was under suspicion in 1949 in the case of Dr. Kurt WESSELY who was suspected of being Soviet agents. Since the suspicion was a denunciation by HOETTL nothing much came of it. Then in 1950 Subject was LCPUTTER in connection with the UJDROSHKY program. Subject's comments were: "This bird is probably engaged in more activity than any other" (of the six candidates). [] on 20 July 1958, however, opens with the sentence: "UTILITY of the LCPUTTER technique and, in the specific case of Subject, has from the outset placed no credence in the unsatisfactory results of the test". Subject has probably worked against Czech operations. He was first Chief of Org 4913, then part of GVA (GVA) at [] DVS (Salzburg). In 1951 he was transferred to [] headquarters, designation 127.15 working on [] operations. He was at that time apparently responsible for the [] of all "build up material" for all Fedrep D/A cases. In 1961 [] reported that SCHREITER had "an almost pathological [] material" but also that CATIDE according to FLEMING [] and [] "above reproach". ECGOT-15306, 27 June 1962 describes [] report of Subject's latest LCPUTTER: "Third in line was the [] of Subject's birth, born 1914, who had been with CATIDE [] years. [] described SCHREITER as a blase, verbose type [] to [] and could no longer be excited about anything. [] in [] and could no longer be excited about anything. [] to testing but pretended to almost fall asleep during the [] test. It was obvious that SCHREITER did not like the man and considered [] somewhat of a transparent phony. At the completion of testing, SCHREITER [] to see the charts and in the words of SCHREITER: "looked them over [] making comments, as though he had been an expert who had seen [] tests". It was later discovered at MLB that SCHREITER had been [] in March, 1953, a fact apparently unknown to [] and not made of by SCHREITER during his second test. SCHREITER [] to [] final conclusion in SCHREITER's test but was inclined [] favorable report of the findings. It was pointed out to SCHREITER []
